GROUNDS FOR TARIFF DETERMINATION:

Under the Amended Regulation Act, 2018, the National Electric Power Regulatory Authority (the "Authority" and/or "NEPRA") is responsible for determining tariffs and other terms and conditions for the supply of electricity by the generation, transmission and distribution companies and to recommend these to the Federal Government, subject to the need to comply with guidelines, not inconsistent with the Amended Regulation Act, 2018, laid down by the Federal Government. NEPRA is also responsible for determining the process and procedures for reviewing tariffs and recommending tariff adjustments.

The Petitioner being a vibrant Distribution& Power Supply Licensee requires adequate funding in order to perform its obligatory duties prescribed by the Authority, under the Amended Regulation Act, 2018, NEPRA Performance Standards (Distribution) Rules 2005, NEPRA Consumer Eligibility Criteria 2003, the Distribution License of GEPCO and other obligations as determined by NEPRA from time to time. The only source of funding available with the Petitioner's Distribution Business is adequate revenue through tariff. GEPCO s' Tariff for its Distribution Business is a very important component of its cost recovery in order to pay its prudent costs on regular basis to ensure continuous flow of power to end consumers.

3. SUBMISSION OF SEPARATE TARIFF PETITIONS:

After amendments in NEPRA Act, 1997, GEPCO has to submit separate Tariff Petitions for each licensed activity, i.e. Distribution and Power Supply as discussed earlier. Accordingly GEPCO is required to obtain separate tariffs for each licensed activity i.e. Power Supply (performing the function of sale of electric power) under Section 23E and Distribution (ownership, operation, management or control of distribution facilities for the movement or delivery to consumers of electric power) under Section 20 of NEPRA (Amendment) Act, 2018. In the light of consultative session of NEPRA with all DISCOs for filing of tariff petitions in accordance with NEPRA (Amendment) Act, 2018 and the NEPRA Templates and Guidelines, the instant petition has been prepared as elaborated below.

3.1 BASIS FOR APPORTIONMENT OF COSTS:

By using the audited figures of Financial Year 2018-19, the following basis have been developed for apportionment of various costs to GEPCO's Power Supply Business for the Financial 2019-20:

3.1.1 Power Purchase Price:

Distribution Business

= NIL

Power Supply Business

= 100%

Being Pass Through hence, nothing is allocated to GEPCO'S Distribution Business and entire Power Purchase Price is allocated to the GEPCO's Power Supply Business.

3.1.2 Salaries, Wages & Other Benefits:

Total Cost (Audited)

erin troun trus (inwhite) etternischen erin 1911 – Albanderaha verschensten = Rs. 14,357 Million

Distribution Business

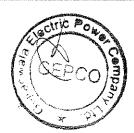

= 75%

Power Supply Business

= 25%

a) The amount of Regularly Paid Salaries & Wages(determined from Payroll) included in the above total cost of Rs. 14,357 Million is Rs. 5,786 Million as tabulated below:

Regularly Paid Salaries & Wages (Audited)	Million Rupees
Basic Payer By HE ENERGE LESS LESS AND LA	3,547
Cash Medical Allowance	150
Conveyance Allowance	327

Revenue Office Staff	437	272
DCM/ROs / CSD	21	27
MIS (Computer Centers)	210	181
Total	2,597	1,447

c) The total number of GEPCO's employees = 12,256
 % of employees of Power Supply = 2,597/12,296 = 21%
 % of employees of Distribution Business = 79%

The total cost of GEPCO's employees = 5,786 Million
% of cost of employees of Power Supply = 1,447/5,786 = 25%
% of cost of employees of Distribution Business = 75%

In view of the above, the following uniform principle has been established and adopted for apportionment of costs for the FY 2019-20:

Page 13 of 18

WACC Where E/V and D/V are equity and debt ratios respectively taken as 30% and 70%. Accordingly the rate calculated for GEPCO is:

WACC = [Ke x (E/V)] + [Kd x (D/V)] WACC = [16.67% x 30%] + [15.75% x 70%] = 16% ... = [5% + 11%] = 16%

a) Return on Equity:

NEPRA uses Capital Asset Pricing Model (CAPM) for calculation of Return on Equity (RoE) component of the WACC. The Authority uses Plain Vanilla WACC, taking tax shield as zero, and in case any tax is paid it is treated as pass through. The Authority determined for the FY 2017-18 determined RoE of 16.67%, wherein the Authority has taken Market Risk Premium as 7% with a Beta of 1.10 and Risk Free Rate of 8.9652%. GEPCO has taken the RoE as 16.67% as determined by the Authority.

b) Cost of Debt:

The cost of debt is the interest rate on which GEPCO would get borrowing from the debt market / commercial banks i.e. a rate at which banks lend to their customers. The Authority used the following formula for estimating the cost of debt for the FY 2017-18;

3 months KIBOR + 2.75% spread

The cost of debt for GEPCO based on above parameter by using Avg. KIBOR of June 19 comes to 13% +2.75% = 15.75%.

The 98% of RORB is apportioned to Distribution Business and 2% Power Supply Business based on assets pertaining to each area as explained earlier in Para 3.1.16.

4.2.4 Other Income:

Other Income is deducted from the Distribution Margin and for FY 2019-20, the amount is projected as 1,767 Million based on previous trend. 70% of other income is allocated to Power Supply Business and 30% to Distribution Business based on audited figures for the FY 2018-19 relating to respective business activity.
